	<b>Examiner</b>	<b>Art Unit</b>	
	Lynda Jasmin	3627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 19 August 2005.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-20 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All    b) Some \* c) None of:
  1. Certified copies of the priority documents have been received.
  2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

1. Response received August 19, 2005 has been acknowledged. Claims 1-20 are pending.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hanagan et al. (2001/0056362 A1), in view of Swartz et al. (2003/0074463).

Hanagan discloses a customer care and billing system having at least one database (via database server 29), a plurality of clients and at least one application server with accompanying clients (see box [298]) are communicating with the at least one database (29), and an appropriate framework (which provide support layer to the developer, and a base upon which business functionality can be developed), wherein relevant services corresponding to desired customers care and billing processes are offered (via all types of electronic transmission, such as wireless see boxes [0022]-[0044]). The system further includes distributed component architecture with components (12, 14, 16, 18 and 22) attributed in correspondence to the relevant services offered (box [0054]). Hanagan further discloses that the system is divided into at least two layers (as illustrated in figure 23), and at least two hierarchically arranged tiers corresponding to

technical tasks (as illustrated in Figure 24) wherein the combined elements of all tiers fulfill the tasks from the storage to the presentation of data over a network such as the Internet. Hanagan further discloses a lowest base layer (392) containing fundamental system behavior and a common layer (box [0296]). The system also a technical services layer (via technical application structure), and an application layer (via software layers 394). The system further includes a business layer containing the domain-specific classes for each component (via business application layers).

Although Hanagan discloses that the components can be integrated together into a system where the components work together, however, Hanagan fails to explicitly disclose that the components communicate with each other directly via interfaces.

Swartz et al. discloses the concept of interfacing core telecommunication system with local service provider. Swartz discloses the use of Local Service Activation Management System “LSAM” hereafter, which is a local service provisioning capability that enables a national and/or international service provider (NSP) to quickly enter into local markets while minimizing the implementation costs and risks. The LSAM system delivers an integrated technical architecture, which shares common integrated technical architecture with shared services and features across the application. The LSAM provides proactive status monitoring, and monitors transactions against transaction level service agreements. Further, as illustrated in Figure 14, the LSAM system interface provides the point of integration between LSAM and all NSP core systems.

From this teaching of Swartz it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the billing and customer care

system of Hanagan to include the direct interface or interaction as taught by Swartz in order to deliver an integrated technical architecture which shares common integrated technical architecture with shared services.

***Response to Arguments***

4. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

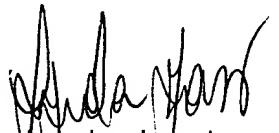

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bowman-Amuah, and Auzenne et al. are cited as art of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda Jasmin whose telephone number is (571) 272-6782. The examiner can normally be reached on Monday- Friday (9:30-6:00) with Thursday Telework.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
